1 Basic OKD Cluster

As SNEK I want to have the possibility to automatically deploy code, in order to save time.

2 Enterprise Connector

As user I want to be able to register on SNEK by using my company GitLab account, in order to visualize my contributions.

3 Migrate Bifrost GraphQL API

As company I want to be able to publish selected private data on SNEK, to display achievements and statistics that I reached locally to the public.

4 SNEK Admin Panel

A User story

5 Company Page

As a company I want to have the possibility of featuring my achievements and statistics on SNEK, in order to find qualified engineers that want to work for my company.

6 Resume Component

As a user I want to have the possibility of featuring my resume on my profile, in order to show others achievements of my life that are not featured on any other platform.

7 Media Engineer Page

As a user that work as a media engineer I want to have the possibility to display my achievements and statistics on SNEK, in order to get job offers and feedback on my work.

8 Follow Functionality

As a user I want to have the possibility of following other users, in order to keep up on their latest post and achievements.

9 Like Functionality

As a user I want to have the possibility to like other users and their achievements, in order to show them that they did something cool and to motivate them to keep on doing it.

10 HackTheBox Data

As a user I want to be able to display my achievements from HackTheBox, in order to display my cyber security skills on my SNEK profile.

11 HackerOne Data

As a user I want to be able to display reports and achievements from HackerOne on my SNEK profile, in order to feature my cyber security skills on my SNEK profile.

12 Instagram Data

As a user I want to be able to display my posts from Instagram, in order to build up my profile as an media engineer.

13 Basic On-Premise Server

As a company I want to be able to analyze my employees contributions without displaying the results to the public, in order to keep private information private.

14 Microsoft OAuth

As user I want to have the possibility to register an account SNEK using my Microsoft account, in order to verify my SNEK profile.

15 Google OAuth

As user I want to have the possibility to register an account SNEK using my Google account, in order to verify my SNEK profile.

16 Snek in the Pipeline

As a company I want to be able to get an in depth source code analyzes, to be able to monitor the work of my employees.

17 TASTIC Engine

As a project manager I want to have all important project information at one place, in order to make project monitoring as efficient as possible.

18 GitHub Issues to PDF

As project manager I want to have the possibility to convert issue from GitHub to PDF files, in order to provide the PDF file to the clients.

19 TONIC for Python

As a developer I want the TONIC to provide coding style for developing with Python, in order to keep Python code clean and readable for external developers.
